Cine 8 Upgrade Instruction

1. Upgrade file package fixed name: **CINERX.tar.gz**

2. Put the file in the *root directory* of your USB Drive

3. Insert the USB Drive into the USB Type-C port of Cine 8 (If your USB Drive port is USBA, you need to use a USBA to USB-C adapter)

4. Check whether there is a USB Drive icon on the top of the Cine 8 screen

5. Open **Menu - System - Software Upgrade**, click **Upgrade**, a progress bar will be displayed, and the device will automatically restart after the upgrade is complete

6. If the Cine8 upgrade progress bar is stuck during the upgrade process, please shut down the device and disconnect the power supply, then upgrade again

7. The upgraded firmware version should be **PS：0216　PL：01020827　MCU：113**

8. If the firmware version MCU number is incorrect, please restart the device manually and check again
